## Hildon Natural Mineral Water

Hildon Natural Mineral Water comes from beneath the chalk hills of the beautiful Hampshire countryside in the South of England. The chalk cliffs that surround the water source are up to 150 metres thick, preventing contamination and ensuring that the water is pollution-free and has a stable composition. The water is wholesome, naturally filtered and crystal-clear.

Hildon is naturally low in sodium and naturally high in calcium and can form part of a well balanced diet to help keep you fit and healthy. A low sodium diet may help prevent against the risk of high blood pressure, which in some people can lead to heart or kidney disease and strokes. Calcium, on the other hand, is a major mineral that is essential for both healthy bones and teeth.
